Diseño de Experiencia de Usuario (UX)
Sesión 5

EGADE Business School
Tecnológico de Monterrey

Dr. Gilberto Olavarrieta

Dr. Carlos Rodríguez

ASSESS
- Customer feedback
- Analyze current KPIs
- Identify strengths & weaknesses

ENVISION
- Set new goals
- Align with stakeholders
- Define the vision going forward for CX

DESIGN
- Set priorities for plan
- Allocate appropriate resources

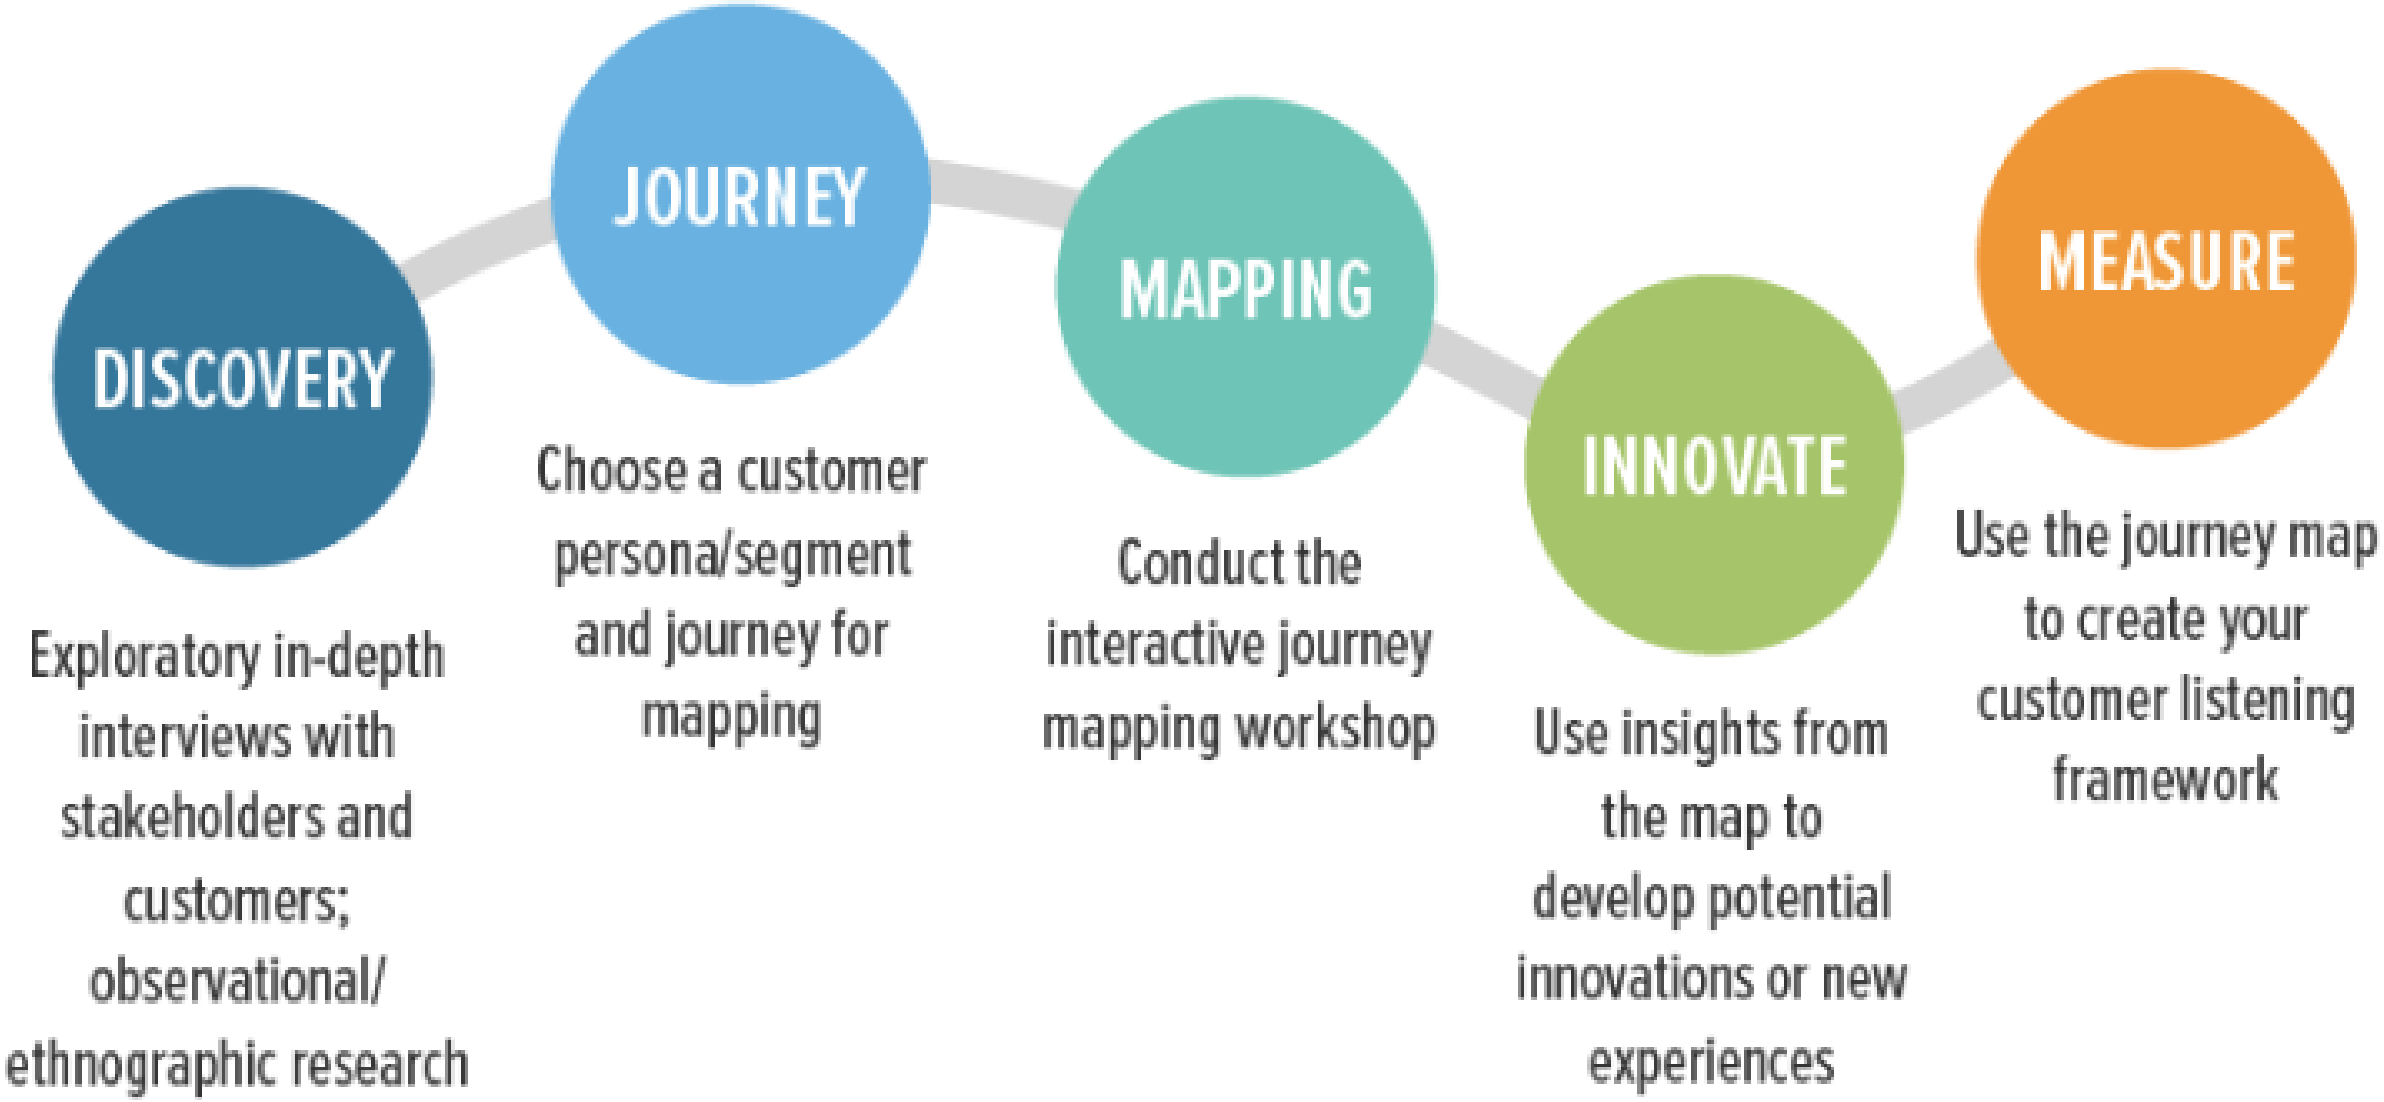
IMPLEMENT
- Mobilize resources
- Deploy new technologies
- Train employees

MEASURE & OPTIMIZE
- Monitor new KPIs
- Obtain ongoing feedback
- Continuously optimize

CX Focus Areas *and* Building Blocks

- Experience-Design Operations
- Customer Insights and Metrics
- Culture Management
- Leadership and Governance

NN/g NNGROUP.COM



DISCOVERY
Exploratory in-depth interviews with stakeholders and customers; observational/ ethnographic research
JOURNEY
Choose a customer persona/segment and journey for mapping
MAPPING
Conduct the interactive journey mapping workshop
INNOVATE
Use insights from the map to develop potential innovations or new experiences
MEASURE
Use the journey map to create your customer listening framework

GENERATE NAME

Goals

Advertising herself as a professional Finding new leads

Quote

I am more than happy to work with companies that have operating income and get paid right away.

Background

Jackie likes to think of herself as a freelance photographer/designer. She's working together with 4 another designers; all of them have graduated from Massachusetts College of art and design. None of them calls their 'gang' a company or business: they're just 5 creative people having fun doing the job they all like the most. Such kind of job has its disadvantages: sometimes Jackie has zero clients, next time – too many of them. However the thing about such a life Jackie likes the most – there are no constraints typical for 'normal' job (waking up at early morning, dress code and so on).
Hobbies: all about coffee (collecting coffee, making coffee, drinking coffee).
In nearest feature Jackie sees herself arranging exhibitions of her own works.d right away.

Motivations

Provide the possibility to impart coffee odor outside so that passers-by were reminded of coffee and wanted to drink it often.

Frustrations

- Too 'serious' approach adapted mostly to business

Customer Journey Map

Maria Johnson

Meet Maria!

Maria is a mid level manager at some company. Her working hours are from 9 a.m. till 6 p.m. She goes to the sea twice a year when having a vacation. Her income is quite good so Maria can afford simple little pleasures (and delicacies)

Maria lives with her fiancée and for two years anniversary of moving in together they got a tabby cat named Kuzya. Maria loves chatting with her friends and having a tasty snack after dinner.

Customer Journey Map

PERSONAS (1)

John, Melomaniac

John is a high school student. He likes baseball and plays for the school team. John trains a lot. He listens to music online on his smartphone while training, doing his homework, and when he doesn't want to interact with his relatives at home. John is not used to wearing headphones as they distract him while playing. John doesn't have a favorite music genre, band, or singer. He likes finding new music. John adds the tracks he likes most to his playlist, that's updated regularly. His friends believe he's a track guru, and he does his best not to disappoint them. John is subscribed to different YouTube music channels. He watches new videos once they appear to catch all the latest hot tracks.

Storyboard							
User actions	John opens his favorite YouTube channel to watch a video with the top 10 music videos of 2023. But he has to watch a pre-roll ad promoting a radio app when the video starts playing.	John closes the YouTube tab. He likes none of the tracks from the video. He starts listening to his old tracklist but gets bored very soon. John starts thinking of other ways to find more new tracks. The pre-roll ad he saw a few minutes ago springs to mind. He decides that a radio app is a good option for him as, by using it, he can listen to a variety of radio stations that often play newly released tracks.	John opens the App Store and tries to find the app there. John installs the app on his device.	John opens the app for the first time. He waits for the app to load for more than a minute. The app loads, and the registration process begins. John enters a username and an email address. He is also asked to enter a home address to proceed. John tries to skip this step, but it's obligatory. The app menu opens. Now John can start interacting with the app. As there's no guidance, John starts getting acquainted with the app himself.	John uses the app regularly. He likes the app as it is simple and gives him access to 1,000+ different stations, shows, and podcasts. John also loves the option to save his favorite streams. He notices some downsides as well.	John's exams are coming in one month. He is going to prepare for them in the library. As John doesn't like wearing headphones, he decides to delete the app not to be tempted to start listening to the radio out loud in the library, where it's prohibited. He also believes that he will improve his concentration while working in silence.	Since 2015, **UXPressia** has been helping businesses, individuals, educational and nonprofit organizations move from product centricity to customer centricity by providing tools, consulting, training, and learning solutions.
User goals	Find a new track for his track list.	Find a new source of the latest music tracks.	Install the app quickly.	Getting started with the app ASAP.	Listen to radio through the app.	Remove distractions while preparing for exams.	**ONLINE PLATFORM** ***Journey mapping, impact mapping, and personas tools*** 70+ free, ready-to-go templates uxpressia.com
Process and channels							
Experience							
Problems	• The ad nearly irritates John as it's too long, and he cannot skip it. • From the ad, John doesn't really understand the benefits of bothering with the app.		• It takes John a little longer than expected to find the app in the Store, as the app name is slightly shorter than the one in the ad. • The app is quite heavy, and John has to delete some other content from his phone to free up space. • The rating for the app isn't excellent, and John hesitates before downloading it.	• John is uncomfortable disclosing his personal information, like his home address, without seeing why it's necessary. • As there is no onboarding, John has trouble navigating through the interface or accessing certain features.	• There are too many embedded ads in the app, which frustrates John. • He also cannot listen to specific songs. The app tends to crash suddenly, and he has to reopen it. • John often listens to the radio before he sleeps. He wants to set a timer, but there's no such option.	• The app becomes a distraction for John.	**ACADEMY** ***Interactive educational platform*** Customer Journey Mapping Fundamentals, Personas, and other online courses academy.uxpressia.com
Ideas	• 80% of people dislike pre-roll ads. To eliminate a negative first impression, make the ad short and sweet. • Follow pre-roll ads' best practices to make the ad more convincing.	• Make the ad memorable. • A/B test your ad for optimal results.	• Consider app title length requirements by Apple and Google before naming your app and launching an ad campaign. • Make sure that people responsible for uploading the app to stores and those involved in its marketing use the same app title. • Try to reduce the app's size by optimizing it so more people can download it. • Work on improving your rating by responding to negative reviews and encouraging loyal, long-term users to leave one.	• Add more functionality to the app. To decide on the features to add, conduct surveys or feedback polls asking your users what they would like. • Reduce the number of ads by introducing a paid subscription plan. • Make additional functions available to paid accounts and remove ads for users with paid plans. • Regularly review crash reports and look out for negative reviews mentioning bugs to timely address the issues and release fixes.	• Add more functionality to the app. • Reduce the number of ads by introducing a paid subscription plan. • Make additional functions available to paid accounts and remove ads for users with paid plans. • Release a new, bug-free version of the app.	• Try push notifications to improve user retention. However, ensuring that these notifications are relevant and not too frequent is essential to avoid annoying users. • Provide personalized recommendations based on the user's preferences and usage history. • Regularly update the app with new features and improvements to keep users engaged. • Integrate social media platforms into the app so that users can share their favorite songs or radio stations.	**EVENTS** ***Community meetups & events for HCD-minded people*** Internal and external experts share their knowledge with the community uxpressia.eventbrite.com

Actividad Bootcamp No. 1 - CX Emphatize

Publicado | Asignar a | Editar

Objetivo(s)

El objetivo de esta actividad es que los estudiantes realicen en equipo un CX Empathize, aplicando los conocimientos vistos en clase. En actividad se definirán los PERSONA los cuales identifican los perfiles de los clientes actuales y potenciales del servicio o producto.

Instrucciones

De acuerdo con los conceptos vistos en clase, ejecuta el **CX Empathize** que contenga los siguientes elementos:

1. Nombra a tu PERSONA.
2. Asigna una FOTO o IMAGEN.
3. Define su PERFIL.
4. Identifica sus METAS / GOALS / GAINS y sus PAINS / FRUSTRACIONES.
5. Completa a la PERSONA con características relevantes a tu caso.

Especificaciones de entrega

El documento final deberá incluir la definición completa de PERSONA de acuerdo a lo visto en clase y alineado con los resultados del CX Research. El formato podrá ser Word o PDF.

- **Modalidad: Equipo**
- **Medio de realización/entrega: Canvas**
